SBCCI is an international forum dedicated to integrated circuits and systems design, held annually in Brazil. The 35th SBCCI will be virtual from Porto Alegre, Brazil. This originates the name **Chip in the Minuano** – Minuano wind is the cold southwesterly current of air that typically affects the region. The symposium aims to bring together researchers in the areas of EDA, design, and test of integrated circuits and systems. The scope of the symposium includes technical sessions, tutorials, panels, exhibitions, and working group meetings. The proceedings will be published by the **IEEE Xplore** and the **ACM Digital Library**. The best papers will be invited to resubmit an extended version to be considered for publication at **IEEE Design & Test**, **Springer Nature ALOG**, or **SBMicro/SBC JICS**. Information about paper submission is available on the conference webpage.
