General guidelines for your poster preparation:

Prioritize the use of figures and plots but remember this is a virtual conference. People need to understand your message and you will not be standing in front of your poster.

Use font sizes between 14-18pt.

Preparing your poster is like telling a story. Do your story have a beginning, development and conclusion?

Do not forget to include your institution name, logo and address. Also make sure your e-mail address is noticeable so people can reach you about your work.

Be creative!!!
